This app uses the following third-party APIs:

- Auto Router**
The app fetches the optimal trade route from a Uniswap Labs server.
- Infura**
The app fetches on-chain data and constructs contract calls with an Infura API.
- TRM Labs**
The app securely collects your wallet address and shares it with TRM Labs Inc. for risk and compliance reasons. [Learn more](#)
- Google Analytics & Amplitude**
The app logs anonymized usage statistics in order to improve over time.
- The Graph**
The app fetches blockchain data from The Graph's hosted service.
